PROFILE SUMMARY

Final-year B.Tech student in Artificial Intelligence and Data Science (2024-2027) with hands-on experience building AI-powered applications using Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), and machine learning. Practical software development experience in Python, SQL, REST APIs, and databases, backed by a SQL for Data Analysis certification and gained through an internship in AI-driven test automation and independent end-to-end projects. Seeking an AI Engineer or Software Engineer role to build intelligent, reliable, data-driven software as part of a collaborative engineering team.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL
- **AI & LLM Engineering:** LLM APIs, Retrieval-Augmented Generation (RAG), Prompt Engineering, FAISS, Chroma (vector databases)
- **Software Development:** Flask, FastAPI, REST APIs, Object-Oriented Programming (OOP), Git, GitHub
- **Machine Learning & Data Science:** Scikit-learn, Pandas, NumPy, NLP, Linear Regression, Random Forest, Data Analysis
- **Databases & Data Analysis (SQL):** MySQL, SQL Querying, Joins, Aggregations, Subqueries, Data Cleaning, Data Analysis using SQL
- **Productivity Tools:** MS Excel
- **Software Testing:** Selenium, Test Automation, Test Case Design, Debugging
- **Languages Known:** English, Tamil

EXPERIENCE

Test Automation Intern (AI/ML – LLM), Pitowings *December 2025 (1 Month)*

- Applied Large Language Model (LLM) concepts to software test automation within a cybersecurity-focused environment.
- Designed and implemented reusable, AI-driven test logic to automate and enhance software testing workflows.
- Collaborated directly with engineers on implementation, gaining hands-on exposure to real-world cybersecurity and QA practices.

PROJECTS

AI Image Detection System (Final Year Project) *In Progress*

- Building a full production system (React/Vite/Tailwind frontend, FastAPI backend, PostgreSQL) with YOLOv8 object detection, CLIP and Grad-CAM explainable AI, similarity search via FAISS, JWT authentication, analytics dashboard and PDF reporting, containerized with Docker.

AI-Powered Security Test Case Generator (LLM + RAG) *In Progress – Target Aug 2026*

- Building a Python tool combining an LLM with Retrieval-Augmented Generation (RAG), grounded in OWASP Top 10 patterns, to auto-generate security test cases for REST APIs.
- Designing modular, reusable backend components using Flask/FastAPI with a FAISS/Chroma vector database for retrieval.

AI Resume Screening System *2025*

- Built a machine learning pipeline (Scikit-learn, Pandas, NLP) to parse resumes and match candidates against job descriptions via keyword and skill extraction.
- Implemented a similarity-scoring algorithm to rank candidates by job relevance.

EDUCATION

B.Tech, Artificial Intelligence and Data Science — SNS College of Technology *2024 – 2027*

CERTIFICATIONS

- **SQL for Data Analysis** — Certified (24 Sep 2026), Certificate Code: 10780809
- Software Engineer — HackerRank Role Certification (Sep 2026)
- SQL (Basic) — HackerRank Certified (Sep 2026)
- Getting Started with Artificial Intelligence — IBM SkillsBuild (Sep 2026)
- Introduction to MS Excel — SkillUp by Simplilearn (Sep 2026)
- Python for Data Science — PrepInsta
- Problem Solving — LeetCode
- ICICI SOP — Certificate of Participation, organised by SNS College of Technology (SNSCT), Coimbatore
